

Are ionCube and Zend Guard Loader installed on your servers?

Article Number: 430 | Rating: 1/5 from 1 votes | Last Updated: Thu, Apr 23, 2015 at 12:18 PM

ionCube and Zend Guard are programs designed to encrypt and obfuscate your PHP code, preventing it from being reverse engineered by another website or company. Both ionCube and Zend Guard Loader are available for use on our servers. You can find which versions are available by clicking on the 'Perl & PHP Module List' icon in your eXtend Control Panel. If you want to use the Zend Guard and Optimizer with a different version of PHP, you will need to switch your website to the different version, using the 'Switch PHP Version' icon in the eXtend Control Panel.
