

Is mod_rewrite installed?

Article Number: 45 | Rating: 1/5 from 1 votes | Last Updated: Wed, Aug 18, 2021 at 1:49 PM

mod_rewrite is installed on all of our Linux servers, and Apache-style rewrites are available on all our Windows servers. mod_rewrite provides you with an easy way to manipulate URLs, taking dynamically-generated URLs and making them closer to static page-style URLs.Â You can read the full documentation of mod_rewrite on the Apache website:

http://httpd.apache.org/docs/current/mod/mod_rewrite.html.
