Can I run an IRC Bot or other IRC related scripts on my hosting account?

Article Number: 492 | Rating: 1/5 from 3 votes | Last Updated: Thu, Apr 23, 2015 at 12:45 PM
The running of any IRC-related scripts on your shared hosting account is strictly forbidden and against our Terms an Conditions. Any account discovered to be running such a script will be disabled. This is to protect other customers o the server. IRC scripts can use up a lot of the server's processing power and cause problems with the other sites. Yo are free to run any number of IRC scripts on one of our Dedicated Server packages.
