

## **Can I run a game server on my hosting account?**

Article Number: 493 | Rating: 1/5 from 1 votes | Last Updated: Thu, Apr 23, 2015 at 12:45 PM

Game servers, such as those for Minecraft, Counter-Strike, and others, are not allowed on our shared hosting accounts. Any account discovered to be running such a script will be disabled. Game servers can take up much of a server's processing power, causing difficulties for the other customers on the server. You are free to run any game server on one of our Hybrid or Dedicated Server packages.
