How do I mount the backup space on my CentOS server?

Article Number: 50 | Rating: 1/5 from 1 votes | Last Updated: Wed, Aug 18, 2021 at 1:15 PM
To mount backup space on your server, you need two programs to be installed. Â If you run the command to mount backup space and it falls, you may need to install them yourself. Log onto your server over SSH Install rpcbind with this command: yum install rpcbind Install nfs-utils with this command: yum install nfs-utils Start the rpcbind service: service rpcbind start Mount the backup space: mount â€"a Your backup space will be mounted
