

How do I install a Let's Encrypt SSL certificate on Plesk (Including Managed VPS)

Article Number: 722 | Rating: 1/5 from 2 votes | Last Updated: Wed, Aug 18, 2021 at 2:14 PM

Let's Encrypt is a certification authority that offers free X.509 SSL certificates for 90 day periods. They are suitable for websites which don't require extended verification or guarantees. Let's Encrypt is packaged with our Managed VPS' and can easily be installed following these steps: Log into Plesk Go to Domains Select the domain you wish to install the SSL certificate Selects Let's Encrypt Enter an email (this is used to urgent contact from Let's Encrypt) Select Install **Note:** The SSL certificate will only be issued if the domain name is pointing to the Managed VPS.
