How do I change the PHP settings in Plesk for a website on my server?

Article Number: 78 | Rating: 1/5 from 2 votes | Last Updated: Wed, Aug 18, 2021 at 2:08 PM

It is assumed that you are using Plesk as a Service Provider.Â If you are using Plesk as a Power User, switch to Service Provider: Go to the 'Server' tab Go to 'Interface Management' Go to 'Panel Appearance' Click 'Service Provider' Click 'OK' You will now be in Service Provider mode To change PHP settings for one site: Click on 'Subscriptions' in the left-hand menu Select the subscription you want to change settings for Click 'Customise' in the top menu Click on 'PHP Settings' tab Enter in the custom values you want for the following settings: memory_limit

 max_execution_time

 max_input_time

 post_max_size

 upload_max_filesize

 safe_mode

 safe_mode_include_dir

 safe_mode_exec_dir

 include_path

 session.save_path

 mail.force_extra_parameters

 register_globals

 open_basedir

 error_reporting

 display_errors

 allow_url_fopen

 file_uploads

 short_open_tag

 magic_quotes_gpc Click the 'Update and Lock' button The changes will be saved for that site
