

Log in to phpMyAdmin in my Linux Hosting account

Article Number: 904 | Rating: 1/5 from 1 votes | Last Updated: Wed, Jun 3, 2020 at 11:10 PM

Here's how to log in to phpMyAdmin to manage your MySQL databases. You can change database values, run queries, and create, view or modify your database structure. Be sure youÂ back up your databaseÂ before modifying it. Go to your Heart InternetÂ [customer area](#)Â and select **cPanel Hosting**. Select the your desired cPanel hosting account and select **Login**. In the upper left corner of the accountÂ **Dashboard**, clickÂ **phpMyAdmin**.

The phpMyAdmin home page for your account appears.
