

How do I set or change the Home Page Creator for my domain name?

Article Number: 91 | Rating: 1/5 from 8 votes | Last Updated: Thu, Apr 23, 2015 at 11:14 AM

The Home Page Creator allows you to create a simple single holding page to place on your domain name. Log into the Domain Name Control Panel Click 'Home Page Creator' Select the template you want to use Fill in the necessary information, including the name, address, email address, phone number, and description Click 'Activate Homepage' The domain name must be on our nameservers for us to work, and it may take up to 24 hours to appear if DNS changes are necessary.
