

Starting over with my Dedicated Server (rebuild)

Article Number: 925 | Rating: Unrated | Last Updated: Wed, Sep 2, 2020 at 2:23 PM

If you want to revert to a clean setup on your Dedicated Server, you can rebuild it (also called reprovisioning), which returns it to the state of a newly purchased server. **⚠ Warning ⚠** Rebuilding erases all of the content on your server hard drive, including all backups, and cannot be undone. Log in to your account. ([Need help logging in?](#)) Under **Manage Products** select **Manage Dedicated Servers**, select the Dedicated Server you wish to use, and select Manage. Next to the server you want to rebuild, click **Manage**. In the upper-right corner of the page, click **Server Actions** and then select **Rebuild Server**. Follow the prompts in the **Rebuild your server** page, and then continue with setting up the server.
