

Restart my Dedicated Server

Article Number: 939 | Rating: 1/5 from 1 votes | Last Updated: Wed, Sep 9, 2020 at 8:13 PM

If you can't reboot your Dedicated Server via SSH, you can restart it from your hosting account. Restarting a Dedicated Server means a full power cycle, so be sure to save any unsaved files before you continue.

Log in to your account. ([Need help logging in?](#)) Under **Manage Products** select **Manage Dedicated Servers**

, select the Dedicated Server you wish to use, and select **Manage**. In the upper-right corner of the page click **Server Actions** > **Power Cycle**. Click **Request Power Cycle**. The power cycle begins and may take a few minutes. When it's done the cycle is added to the History list for the server. **More info**

[Here's how to rebuild your server](#) from scratch. Back up your files first!
