

Change the hostname for my server

Article Number: 978 | Rating: 1/5 from 3 votes | Last Updated: Wed, Sep 2, 2020 at 8:31 PM

Here's how to change the hostname for your Dedicated Server. Log in to your account. ([Need help logging in?](#)) Under **Manage Products** select **Manage Dedicated Servers**, select the Dedicated Server you wish to use, and select **Manage**. In the account **Dashboard**, at the top of the page select **Settings**. In the **Server** section, next to **Hostname**, click **Change**. Enter the **new hostname** in the **Server Hostname** field, and then click **Save**. The hostname must meet the requirements before you can save it. After you save the changes, the new hostname appears in the Settings section. **Note:** If you're using Plesk with Windows, you need to **restart the server** before the new hostname appears in Plesk.
