

Connect via Remote Desktop (RDC) to my Windows server

Article Number: 985 | Rating: 1/5 from 3 votes | Last Updated: Wed, Sep 9, 2020 at 8:17 PM

You can use Microsoft's Remote Desktop Connection (RDC) to manage your Windows Dedicated server. On your Windows computer, launch Remote Desktop Connection. Enter your server's IP address and click Connect. When prompted, enter your server's Username and Password, and then click OK.
